

DATE

31-08-2021

INVESTMENT OBJECTIVE

The primary investment objective of the portfolio is to provide the investor with a moderate level of income while preserving capital in real terms over the medium term. This is a low equity portfolio with a maximum of 40% in equities and is structured to remain within the prudential guidelines (Regulation 28). The portfolio targets returns in excess of the ASISA South African Multi Asset Low Equity category over a rolling 24 month period.

FUND INFORMATION

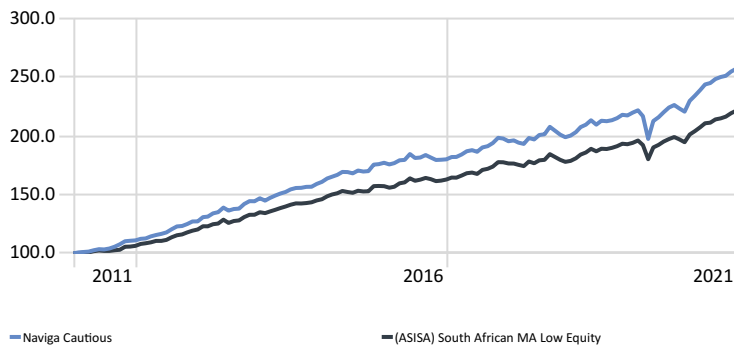

Portfolio manager: Investment Committee
 Launch date: 1 January 2011

RISK-REWARD

Time Period: 01-01-2011 to 31-08-2021

Calculation Benchmark: (ASISA) South African MA Low Equity

RISK PROFILE

Low | Low - Medium

- Generally low risk portfolios have minimal equity exposure or no equity exposure, resulting in far less volatility than a more aggressive mandated portfolio and in turn the probability of capital loss (permanent/temporary) is less likely.
- However, expected potential long term investment returns could be lower over the medium to long term.

DISCLAIMER

Managed by: Naviga Solutions. Authorised Financial Service Provider, FSP Number 381.

The fund allocation (above) indicates the model portfolio fund holdings, which are quantitatively and qualitatively assessed on a quarterly basis by the independent investment committee. Where any of the above funds are not available on any particular Linked Investment Service Provider (LISP) platform, an appropriately comparable replacement fund is selected by the investment committee. Due to the possible fund composition variations resulting from such comparable replacements, the actual overall asset allocation, fees and returns may differ across platforms. Periodic portfolio rebalancing is initiated by the investment committee to realign strategic allocations whilst taking specific account of the intended risk and return profiles of the portfolios as well as capital gains tax and cost effects. Past performance is not indicative of future performance. The capital or the return of a portfolio is not guaranteed. A wrap fund is a portfolio consisting of a number of underlying investments wrapped into a single product. Wrap funds are not legal CIS funds of funds as the wrap fund itself is not a collective investment portfolio, but is simply a collection of separate collective investment portfolios and money market accounts. With a wrap fund the investor has direct ownership of the underlying investments. Wrap funds are not regulated by the Collective Investment Schemes Control Act and do not have a separate legal status. They are regulated by the same legislation that applies to Linked Investment Services Providers (LISPs), namely the Stock Exchanges Control Act and the Financial Markets Control Act. Investors should take note that any changes made within a wrap fund can trigger capital gains tax.

This document should not be seen as an offer to purchase any specific product and is not to be construed as advice or guidance in any form whatsoever. Investors are encouraged to obtain independent professional investment and taxation advice before investing in the model portfolios.

The portfolio's performance numbers are based on a master portfolio tracked in the Morningstar Direct system. These performance numbers are net of all underlying managers TER's, but gross of the model portfolio management, LISP and advice fees. The Effective Annual Cost (EAC) can be obtained from the specific Linked Investment Service Provider (LISP).
